Okay as for dead plants here is an update...

2 of the 9 ACEPENS recovered, they have fallen over but are leafing out and actually have flowers! Maybe we can stand them back up.

1 AROMEL recovered – so now only missing 3 HF (can't replace) and 1 WM (can replace)

3 SORAME are missing now! Can replace 1 SH, can't replace 2 GR

7 DIEILON are dead now... can replace 4 of 7 (missing 2 GR and 1 SH)

And now we're missing 1 QUERUB but can't replace.

But! The SAMRAC recovered!

So recoverable plants now:

1 AROMEL

1 BETALL

4 DIEILON

2 SORAME

= 9 plants!

Replace Mislabeled:

1 ALNINC

And Backups:

ALNINC – plant one more of each site --> 4

BETALL – plant one more of each 3 sites (GR/WM/SH) --> 3

BETPOP – have at GR/HF/WM in CG, could add 1 GR/WM --> 2

MYRGAL – plant one more from each of 3 sites (GR/WM/SH) --> 3

VIBCAS – plant one more from each of 3 sites (GR/WM/SH) --> 3

AROMEL – one for WM and one for HF --> 2

= TOTAL of 17 more

Total planting tally = 27 plants!

Hi all,

Thanks Lizzie!

1) I will be chatting with Kea later today to see how many plots we have

2) we can replace one of the three – ALNINC WM – but the plant in it's place is a beautiful BETPOP so maybe we can still leave that?

3) to be finalized Monday morning with Dan before 9:30am

4) Still double checking but first glance seems accurate

I just checked all of the plants to be moved from the raised beds to makes sure they looked healthy enough to move – everything looks great!

There is an extra AROMEL for HF and for WM as well!

All the best,
Cat

Hi Cat and Dan (cc Kea),

Okay, I have been pouring over our common garden info and here's the recap plus my request for help.

We have about 25 dead with no replacements. We have 10 dead we could replace and 15 more I think we should plant from the RB as safety extras. So 25 plants to plant ... plus any we decide to move. I think this will take a little while since we also have to mark out the plots.

ACTION items (Dan and Cat -- can you divide and conquer this list?):

(1) Look at the planting list in RaisedBeds_2018 and sketch a plan of where things could be planted? I imagine we need 1-2 more plots beyond the extra shaded plot, hopefully this is feasible. Also answer the queries in the questions column.

(2) Track down ALL plants that are mislabelled and see if we can replace them from the raised beds?

(3) Assemble spraypaint, shovels, tape measure, razor to cut weedcloth, and whatever else I am forgetting that we need for Monday AM.

ITEMS it would be good to do if time allows:

(4) Double check that our dead list is accurate!

I think that's it. Otherwise I will be at Weld Hill at 9:30am Monday!
Pizza etc. on me at noon at A&N. Please remember sunscreen, a hat and good boots.

All the best,

Lizzie

PS: Please git pull: <https://github.com/lizzieinvancouver/wildhellgarden>

<> <> <> <> <> <> <> <> <> <> <>
 <> Based on my reading ... <>
 <> <> <> <> <> <> <> <> <> <> <>

9 ACEPEN have died and we do NOT have replacements
5 AROMEL have died and we potentially can replace 1/5 from WM from the raised beds (the other 4 dead are from HF -- double check the raised beds for these!)

1 BETALL has died and we have a replacement (plus extras)
1 BETPAP has died but we do NOT have a replacement
4 DIELON have died and we have replacements for 3/4 (2 GR, 1 SH -- need 1 more GR)

2 SAMRAC has died, and we have replacements
5-7 SORAME have died and we have 2 replacements (from SH)
2 SPIALB have died and we NOT have replacements for correct site (we have WM, we have SH)

4 SPITOM have died and we have NOT replacements
2 VACMYR have died and we do NOT have replacements

TOTAL replacements:

1 AROMEL
1 BETALL

3 DIELON
2 SAMRAC
2 SORAME
= 10 plants!

Total dead with no replacements:

9 ACEPEN SH/HF/WM
4 AROMEL (need 4 HF)
1 BETPAP GR
1 DIELON GR
3 SORAME GR
2 SPIALB WM
3-4 SPITOM HF/SH
2 VACMYR GR/WM

- Backups where we have them...

- ALNINC - plant one more of each site --> 4
 - BETALL - plant one more of each 3 sites (GR/WM/SH) --> 3
 - BETPOP - have at GR/HF/WM in CG, could add 1 GR/WM --> 2
 - DIELON - need WM
 - 1 FAGGRA, sadly it's too few
 - MYRGAL - plant one more from each of 3 sites (GR/WM/SH) --> 3
 - VIBCAS - plant one more from each of 3 sites (GR/WM/SH) --> 3
- = TOTAL of 15 more

- We could also back up AROMEL *if* we have 1 more of WM and HF.
