Hi Lizzie,

I think it will be a good idea to relocate those plants regardless of whether we can address the drainage issue – mostly because that problem won't be solved by the time you're here to plant, so it makes sense to relocate and get those plants out of the way of any work that needs to be done. There are currently two empty shade plots bordering your existing plots (plots 14 and 20 –I'm attaching the graphic). I am also working on getting an estimate for installing an additional shade structure in plot 16, which would not require you to move plants very far, but I have no idea whether that plan will work out. Either way, there are two shade plots available for you.

Kea

Subject: Re: Question

Hi Kea,

Okay! Let me know what you hear. Another question: Do we have shade cloth on other plots (I am not sure how I can forget this but I did) or would we need to add shade cloths plots for re-planting the ones that died (and potentially some back up individuals)?

We're planning to play morning of Monday, 14 May with time on 15 May as needed.

'Best,
Lizzie

Hi Lizzie,
I'm not sure about that yet – I am planning on meeting with some grounds dept. folks to determine whether we can fix the drainage issue in that spot. I will let you know when I know more!

Subject: Question

Hi Kea,

In planning for planting in May we're wondering if you think we should try to relocate the non-dead of plots 10–11 (about 38 plants I think).

Our notes etc. are here:

https://github.com/lizzieinvancouver/wildhellgarden/tree/master/Planning/planning_2018

Thanks!
Lizzie
